PART 2A - APPENDIX 1 WRAP FEE PROGRAM BROCHURE

This brochure provides information about the qualifications and business practices of Vantage Wealth Management LLC. If you have any questions about the contents of this brochure, contact us at 541-207-5993. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Vantage Wealth Management LLC is available on the SEC's website at www.adviserinfo.sec.gov.

Vantage Wealth Management LLC is a registered investment adviser. Registration with the United States Securities and Exchange Commission or any state securities authority does not imply a certain level of skill or training.

Item 2 Summary of Material Changes

Form ADV Part 2 requires registered investment advisers to amend their brochure when information becomes materially inaccurate. If there are any material changes to an adviser's disclosure brochure, the adviser is required to notify you and provide you with a description of the material changes.

There have been no material changes since the last annual updating amendment.

Item 4 Services, Fees, and Compensation

Description of Firm

Vantage Wealth Management LLC is a registered investment adviser primarily based in Corvallis, OR. We are organized as a limited liability company ("LLC") under the laws of the State of Oregon. We have been providing investment advisory services since 01/01/2023. We are primarily owned by Brian Donne.

As used in this brochure, the words "we," "our," and "us" refer to Vantage Wealth Management LLC and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm. Also, you may see the term Associated Person in this brochure. Our Associated Persons are our firm's officers, employees, and all individuals providing investment advice on behalf of our firm.

We offer portfolio management services through a wrap-fee program ("Program") as described in this wrap fee program brochure to certain legacy clients. We are the sponsor and investment adviser for the Program. A wrap-fee program is a type of investment program that provides clients with asset management and brokerage services for one all-inclusive fee. For those legacy clients that are participating in our wrap fee program, you will pay our firm a single fee, which includes money management fees, certain transaction costs, and custodial and administrative costs. You are not charged separate fees for the respective components of the total services. We receive a portion of the wrap fee for our services.

Those clients in the Program, enter into a separate written agreements with us that set forth the terms and conditions of the engagement and describe the scope of the services to be provided, and the fees to be paid.

Client Investment Process

Assets for program accounts are held at Schwab as custodian. Schwab also acts as executing broker/dealer for transactions placed in Program accounts, and provides other administrative services as described throughout this Brochure.

Changes in Your Financial Circumstances

In providing the contracted services, we are not required to verify any information we receive from you or from your other professionals (e.g., attorney, accountant, etc.) and we are expressly authorized to rely on the information you provide. Furthermore, unless you indicate to the contrary, we shall assume that there are no restrictions on our services, other than to manage your account in accordance with your designated investment objectives, risk tolerance, and time horizon (collectively, "investment parameters"). It is your responsibility to promptly notify us if there are ever any changes in your financial situation or investment parameters for the purpose of reviewing, evaluating, and/or revising our previous recommendations and services.

The Program Fee

We charge an annual "wrap-fee" for participation in the Program depending upon the market value of your assets under our management. You are not charged separate fees for the different components of the services provided by the Program. Our firm pays all trade expenses of trades placed on your behalf. Our Program fee includes the fee we pay to any portfolio manager for their management of your account and Schwab's transaction or execution costs. Assets in each of your account(s) are included in the fee assessment unless specifically identified in writing for exclusion. In special circumstances, and in our sole discretion, we may negotiate a lesser management fee based upon certain criteria (i.e., anticipated future earning capacity, dollar amount of assets to be managed, related accounts, account composition, pre-existing client relationship, account retention, etc.).

The wrap fee charged ranges from .65 up to 1.2%. The total of this fee is paid to Vantage as manager and sponsor of the program and no portion is paid to a third-party manager.

Our annual portfolio management fee is billed and payable quarterly in arrears based on the account balance at end of billing period.

If the portfolio management agreement is executed at any time other than the first day of a calendar quarter, our fees will apply on a pro-rata basis, which means that the advisory fee is payable in proportion to the number of days in the quarter for which you are a client.

At our discretion, we may combine the account values of family members living in the same household to determine the applicable advisory fee. For example, we may combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts. The accounts we combine will be identified in our client agreement or in an addendum to the client agreement.

A wrap fee is not based directly on the number of transactions in your account. Various factors influence the relative cost of our wrap fee program to you, including the cost of our investment advice, custody and brokerage services if you purchased them separately, the types of investments held in your account, and the frequency, type and size of trades in your account. The program could cost you more or less than purchasing our investment advice and custody/brokerage services separately.

When managing a client's account on a wrap fee basis, we receive as compensation for our investment advisory services, the balance of the total wrap [or program] fee you pay after custodial, trading and other management costs (including execution and transaction fees) have been deducted. Accordingly, we have a conflict of interest because we have a financial incentive to maximize our compensation by seeking to reduce or minimize the total costs incurred in your account(s) subject to a wrap fee.

Withdrawal of Assets

You may withdraw account assets on notice to our firm, and subject to the usual and customary securities settlement procedures. However, we design our portfolios as long-term investments and asset withdrawals may impair the achievement of your specific investment objectives.

We encourage you to reconcile our invoices with the statement(s) you receive from the qualified custodian. If you find any inconsistent information between our invoice and the statement(s) you receive from the qualified custodian call our main office number located on the cover page of this brochure.

Termination of Advisory Relationship

You may terminate the wrap fee program agreement upon 5 days' written notice to our firm. You will incur a pro-rata charge for services rendered prior to the termination of the wrap fee program agreement, which means you will incur advisory fees only in proportion to the number of days in the quarter for which you are a client. If you have pre-paid advisory fees that we have not yet earned, you will receive a prorated refund of those fees.

Upon termination of accounts held at Schwab, they will deliver securities and funds held in the account per your instructions unless you request that the account be liquidated. After the wrap fee program agreement has been terminated, transactions are processed at the prevailing brokerage rates/fees. You become responsible for monitoring your own assets and our firm has no further obligation to act upon or to provide advice with respect to those assets.

For Clients in Washington State:

Adviser will send the client a written invoice, including the fee, the formula used to calculate the fee, the fee calculation itself, the time period covered by the fee, and, if applicable, the amount of assets under management on which the fee was based. Also, the Adviser will include the name of the custodian(s) on your fee invoice. The Adviser will send these to the client concurrent with the request for payment or payment of the Adviser's advisory fees. We urge the client to compare this information with the fees listed in the account statement.

Additional Fees And Expenses

The Program Fee includes the costs of brokerage commissions for transactions executed through the Qualified Custodian (or a broker-dealer designated by the Qualified Custodian), and charges relating to the settlement, clearance, or custody of securities in the Account. The Program Fee does not include mark-ups and mark-downs, dealer spreads or other costs associated with the purchase or sale of securities, interest, taxes, or other costs, such as charges for transactions not executed through the Qualified Custodian, costs associated with exchanging currencies, wire transfer fees, or other fees required by law or imposed by third parties. The Account will be responsible for these additional fees and expenses.

The wrap program fees that you pay to our firm for portfolio management services are separate and distinct from the fees and expenses charged by mutual funds or exchange traded funds (described in each fund's prospectus) to their shareholders. These fees will generally include a management fee and other fund expenses. To fully understand the total cost you will incur, you should review all the fees charged by mutual funds, exchange traded funds, our firm, and others.

Schwab generally does not charge commissions [or transaction fees] for online trades of U.S. exchange-listed securities (including U.S. exchange-listed ETFs), options (subject to \$0.65 per contract fee), and no-transaction-fee ("NTF") funds. This means that, in most cases, when we buy these types of securities, we can do so without paying any commissions to Schwab. We encourage you to review Schwab's pricing to compare the total costs of entering into a wrap fee arrangement versus a non-wrap fee arrangement. If you choose to enter into a wrap fee arrangement, your total cost to invest could exceed the cost of paying for brokerage and advisory services separately.

Brokerage Practices

Clients participating in the Program, have established accounts with Charles Schwab, member FINRA/SIPC, an unaffiliated SEC-registered broker-dealer.

Research and Other Soft Dollar Benefits

We do not have any soft dollar arrangements.

Aggregated Trades

We generally process transactions for each Client account independently, unless we decide to purchase or sell the same securities for several Clients at approximately the same time. Our firm may (but is not obligated to) combine or "batch" orders for a variety of factors. Some factors are to obtain

best execution. Under this procedure, the share price will be averaged and will be allocated among our firm's clients in proportion to the purchase and sale orders placed for each client account, on any given day.

Brokerage for Client Referrals

We do not receive client referrals from broker-dealers in exchange for cash or other compensation, such as brokerage services or research.

Mutual Fund Share Classes

Mutual funds are sold with different share classes, which carry different cost structures. Each available share class is described in the mutual fund's prospectus. When we purchase, or recommend the purchase of, mutual funds for a client, we select the share class that is deemed to be in the client's best interest, taking into consideration the availability of advisory, institutional or retirement plan share classes, initial and ongoing share class costs, transaction costs (if any), tax implications, cost basis and other factors.

Item 5 Account Requirements and Types of Clients

We offer investment advisory services to individuals, corporations and high net worth individuals.

In general, we do not require a minimum dollar amount to open and maintain an advisory account; however, we have the right to terminate your account if it falls below a minimum size and we determine, in our sole opinion, is too small to manage effectively. Typically, the minimum account size is \$10,000.

We may also combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts to meet the minimum size that we may determine is necessary to manage effectively.

Item 6 Portfolio Manager Selection and Evaluation

We are the sponsor and sole portfolio manager for the Program. Refer to *Services, Fees, and Compensation* for additional disclosures on costs associated with your participation in the Program.

Performance-Based Fees and Side-by-Side Management

We do not accept performance-based fees or participate in side-by-side management. Performance-based fees are fees that are based on a share of capital gains or capital appreciation of a client's account. Side-by-side management refers to the practice of managing accounts that are charged performance-based fees while at the same time managing accounts that are not charged performance-based fees. Our fees are calculated as described above, and are not charged on the basis of a share of capital gains upon, or capital appreciation of, the funds in your advisory account.

Our Methods of Analysis and Investment Strategies

We use one or more of the following methods of analysis or investment strategies when providing investment advice to you:

Technical Analysis - involves studying past price patterns, trends and interrelationships in the financial markets to assess risk-adjusted performance and predict the direction of both the overall market and specific securities.

Risk: The risk of market timing based on technical analysis is that our analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Fundamental Analysis - involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience and expertise of the company's management, and the outlook for the company and its industry. The resulting data is used to measure the true value of the company's stock compared to the current market value.

Risk: The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Cyclical Analysis - a type of technical analysis that involves evaluating recurring price patterns and trends. Economic/business cycles may not be predictable and may have many fluctuations between long-term expansions and contractions.

Risk: The lengths of economic cycles may be difficult to predict with accuracy and therefore the risk of cyclical analysis is the difficulty in predicting economic trends and consequently the changing value of securities that would be affected by these changing trends.

Modern Portfolio Theory - a theory of investment which attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, by carefully diversifying the proportions of various assets.

Risk: Market risk is that part of a security's risk that is common to all securities of the same general class (stocks and bonds) and thus cannot be eliminated by diversification.

Long-Term Purchases - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

Risk: Using a long-term purchase strategy generally assumes the financial markets will go up in the long-term which may not be the case. There is also the risk that the segment of the market that you are invested in or perhaps just your particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

Short-Term Purchases - securities purchased with the expectation that they will be sold within a relatively short period of time, generally less than one year, to take advantage of the securities' short-term price fluctuations.

Risk: Using a short-term purchase strategy generally assumes that we can predict how financial markets will perform in the short-term which may be very difficult and will incur a disproportionately higher amount of transaction costs compared to long-term trading. There are many factors that can affect financial market performance in the short-term (such as short-term interest rate changes, cyclical earnings announcements, etc.) but may have a smaller impact over longer periods of times.

Our investment strategies and advice may vary depending upon each client's specific financial situation. As such, we determine investments and allocations based upon your predefined objectives, risk tolerance, time horizon, financial information, liquidity needs and other various suitability factors. Your restrictions and guidelines may affect the composition of your portfolio. **It is important that you notify us immediately with respect to any material changes to your financial circumstances, including for example, a change in your current or expected income level, tax circumstances, or employment status.**

Cash Management

We manage cash balances in your account based on the yield, and the financial soundness of the money markets and other short term instruments.

Tax Considerations

Our strategies and investments may have unique and significant tax implications. However, unless we specifically agree otherwise, and in writing, tax efficiency is not our primary consideration in the management of your assets. Regardless of your account size or any other factors, we strongly recommend that you consult with a tax professional regarding the investing of your assets.

Risk of Loss

Investing in securities involves risk of loss that you should be prepared to bear. We do not represent or guarantee that our services or methods of analysis can or will predict future results, successfully identify market tops or bottoms, or insulate clients from losses due to market corrections or declines. We cannot offer any guarantees or promises that your financial goals and objectives will be met. Past performance is in no way an indication of future performance.

Other Risk Considerations

When evaluating risk, financial loss may be viewed differently by each client and may depend on many different risks, each of which may affect the probability and magnitude of any potential losses. The following risks may not be all-inclusive, but should be considered carefully by a prospective client before retaining our services.

Liquidity Risk: The risk of being unable to sell your investment at a fair price at a given time due to high volatility or lack of active liquid markets. You may receive a lower price or it may not be possible to sell the investment at all.

Credit Risk: Credit risk typically applies to debt investments such as corporate, municipal, and sovereign fixed income or bonds. A bond issuing entity can experience a credit event that could impair or erase the value of an issuer's securities held by a client.

Inflation and Interest Rate Risk: Security prices and portfolio returns will likely vary in response to changes in inflation and interest rates. Inflation causes the value of future dollars to be worth less and may reduce the purchasing power of a client's future interest payments and principal. Inflation also generally leads to higher interest rates which may cause the value of many types of fixed income investments to decline.

Horizon and Longevity Risk: The risk that your investment horizon is shortened because of an unforeseen event, for example, the loss of your job. This may force you to sell investments that you were expecting to hold for the long term. If you must sell at a time that the markets are down, you may lose money. Longevity Risk is the risk of outliving your savings. This risk is particularly relevant for people who are retired, or are nearing retirement.

Recommendation of Particular Types of Securities

We recommend various types of securities and we do not primarily recommend one particular type of security over another since each client has different needs and different tolerance for risk. Each type of security has its own unique set of risks associated with it and it would not be possible to list here all of the specific risks of every type of investment. Even within the same type of investment, risks can vary widely. However, in very general terms, the higher the anticipated return of an investment, the higher the risk of loss associated with the investment. A description of the types of securities we may recommend to you and some of their inherent risks are provided below.

Money Market Funds: A money market fund is technically a security. The fund managers attempt to keep the share price constant at \$1/share. However, there is no guarantee that the share price will stay at \$1/share. If the share price goes down, you can lose some or all of your principal. The U.S. Securities and Exchange Commission ("SEC") notes that "While investor losses in money market funds have been rare, they are possible." In return for this risk, you should earn a greater return on your cash than you would expect from a Federal Deposit Insurance Corporation ("FDIC") insured savings account (money market funds are not FDIC insured). Next, money market fund rates are variable. In other words, you do not know how much you will earn on your investment next month. The rate could go up or go down. If it goes up, that may result in a positive outcome. However, if it goes down and you earn less than you expected to earn, you may end up needing more cash. A final risk you are taking with money market funds has to do with inflation. Because money market funds are considered to be safer than other investments like stocks, long-term average returns on money market funds tends to be less than long term average returns on riskier investments. Over long periods of time, inflation can eat away at your returns.

Certificates of Deposit: Certificates of deposit ("CD") are generally a safe type of investment since they are insured by the Federal Deposit Insurance Company ("FDIC") up to a certain amount. However, because the returns are generally low, there is risk that inflation outpaces the return of the CD. Certain CDs are traded in the market place and not purchased directly from a banking institution. In addition to trading risk, when CDs are purchased at a premium, the premium is not covered by the FDIC.

Municipal Securities: Municipal securities, while generally thought of as safe, can have significant risks associated with them including, but not limited to: the credit worthiness of the governmental entity that issues the bond; the stability of the revenue stream that is used to pay the interest to the bondholders; when the bond is due to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same amount of interest or yield to maturity.

Stocks: There are numerous ways of measuring the risk of equity securities (also known simply as "equities" or "stock"). In very broad terms, the value of a stock depends on the financial health of the company issuing it. However, stock prices can be affected by many other factors including, but not limited to the class of stock (for example, preferred or common); the health of the market sector of the issuing company; and, the overall health of the economy. In general, larger, better established companies ("large cap") tend to be safer than smaller start-up companies ("small cap") are but the mere size of an issuer is not, by itself, an indicator of the safety of the investment.

Mutual Funds and Exchange Traded Funds: Mutual funds and exchange traded funds ("ETF") are professionally managed collective investment systems that pool money from many investors and invest in stocks, bonds, short-term money market instruments, other mutual funds, other securities, or any combination thereof. The fund will have a manager that trades the fund's investments in accordance with the fund's investment objective. While mutual funds and ETFs generally provide diversification, risks can be significantly increased if the fund is concentrated in a particular sector of the market, primarily invests in small cap or speculative companies, uses leverage (i.e., borrows money) to a

significant degree, or concentrates in a particular type of security (i.e., equities) rather than balancing the fund with different types of securities. ETFs differ from mutual funds since they can be bought and sold throughout the day like stock and their price can fluctuate throughout the day. The returns on mutual funds and ETFs can be reduced by the costs to manage the funds. Also, while some mutual funds are "no load" and charge no fee to buy into, or sell out of, the fund, other types of mutual funds do charge such fees which can also reduce returns. Mutual funds can also be "closed end" or "open end". So-called "open end" mutual funds continue to allow in new investors indefinitely whereas "closed end" funds have a fixed number of shares to sell which can limit their availability to new investors.

ETFs may have tracking error risks. For example, the ETF investment adviser may not be able to cause the ETF's performance to match that of its Underlying Index or other benchmark, which may negatively affect the ETF's performance. In addition, for leveraged and inverse ETFs that seek to track the performance of their Underlying Indices or benchmarks on a daily basis, mathematical compounding may prevent the ETF from correlating with performance of its benchmark. In addition, an ETF may not have investment exposure to all of the securities included in its Underlying Index, or its weighting of investment exposure to such securities may vary from that of the Underlying Index. Some ETFs may invest in securities or financial instruments that are not included in the Underlying Index, but which are expected to yield similar performance.

Variable Annuities: A variable annuity is a form of insurance where the seller or issuer (typically an insurance company) makes a series of future payments to a buyer (annuitant) in exchange for the immediate payment of a lump sum (single-payment annuity) or a series of regular payments (regular-payment annuity). The payment stream from the issuer to the annuitant has an unknown duration based principally upon the date of death of the annuitant. At this point, the contract will terminate and the remainder of the funds accumulated forfeited unless there are other annuitants or beneficiaries in the contract. Annuities can be purchased to provide an income during retirement. Unlike fixed annuities that make payments in fixed amounts or in amounts that increase by a fixed percentage, variable annuities, pay amounts that vary according to the performance of a specified set of investments, typically bond and equity mutual funds. Many variable annuities typically impose asset-based sales charges or surrender charges for withdrawals within a specified period. Variable annuities may impose a variety of fees and expenses, in addition to sales and surrender charges, such as mortality and expense risk charges; administrative fees; underlying fund expenses; and charges for special features, all of which can reduce the return. Earnings in a variable annuity do not provide all the tax advantages of 401(k)s and other before-tax retirement plans. Once the investor starts withdrawing money from their variable annuity, earnings are taxed at the ordinary income rate, rather than at the lower capital gains rates applied to other non-tax-deferred vehicles which are held for more than one year. Proceeds of most variable annuities do not receive a "step-up" in cost basis when the owner dies like stocks, bonds and mutual funds do. Some variable annuities offer "bonus credits." These are usually not free. In order to fund them, insurance companies typically impose mortality and expense charges and surrender charge periods. In an exchange of an existing annuity for a new annuity (so-called 1035 exchanges), the new variable annuity may have a lower contract value and a smaller death benefit; may impose new surrender charges or increase the period of time for which the surrender charge applies; may have higher annual fees; and provide another commission for the broker.

Real Estate Investment Trust: A real estate investment trust ("REIT") is a corporate entity which invests in real estate and/or engages in real estate financing. A REIT reduces or eliminates corporate income taxes. REITs can be publicly or privately held. Public REITs may be listed on public stock exchanges. REITs are required to declare 90% of their taxable income as dividends, but they actually pay dividends out of funds from operations, so cash flow has to be strong or the REIT must either dip into reserves, borrow to pay dividends, or distribute them in stock (which causes dilution). After 2012, the IRS stopped permitting stock dividends. Most REITs must refinance or erase large balloon debts

periodically. The credit markets are no longer frozen, but banks are demanding, and getting, harsher terms to re-extend REIT debt. Some REITs may be forced to make secondary stock offerings to repay debt, which will lead to additional dilution of the stockholders. Fluctuations in the real estate market can affect the REIT's value and dividends.

Proxy Voting

We will not vote proxies on behalf of your advisory accounts. At your request, we may offer you advice regarding corporate actions and the exercise of your proxy voting rights. If you own shares of applicable securities, you are responsible for exercising your right to vote as a shareholder.

In most cases, you will receive proxy materials directly from the account custodian. However, in the event we were to receive any written or electronic proxy materials, we would forward them directly to you.

Item 7 Client Information Provided to Portfolio Managers

In order to provide the Program services, we will share your private information with your account custodian, Charles Schwab. We may also provide your private information to mutual fund companies as needed. We will only share the information necessary in order to carry out our obligations to you in servicing your account. We share your personal account data in accordance with our privacy policy as described in our Privacy Notice (provided under separate cover).

Item 8 Client Contact with Portfolio Managers

Without restriction, you should contact our firm or your advisory representative directly with any questions regarding your Program account. You should contact your advisory representative with respect to changes in your investment objectives, risk tolerance, or requested restrictions placed on the management of your Program assets.

Item 9 Additional Information

We are required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of our advisory business or the integrity of our management. We do not have any required disclosures under this item.

Other Financial Industry Activities and Affiliations

Licensed Insurance Agency

Our firm is also licensed as an insurance agency. Therefore, persons providing investment advice on behalf of our firm may be licensed as insurance agents. These persons will earn commission-based compensation for selling insurance products, including insurance products they sell to you. Insurance commissions earned by these persons are separate from our advisory fees. See the *Fees and Compensation* section in the 2A brochure for more information on the compensation received by insurance agents who are affiliated with our firm.

Dually Registered Investment Adviser Representatives

IAR Eric Cheney works as an investment adviser representative for Turman Financial Group, LLC. He spends approximately 20 hours per week in this capacity. He may provide asset management services or financial planning and consulting services and earn advisory fees for providing such services. Therefore, you could receive advisory services from one individual who can act as an IAR on behalf of two separate registered investment advisers. This dual registration is a conflict of interest

because your IAR may receive more or less compensation as a result of his or her registration with us and the unaffiliated investment adviser and may have access to different programs and services. You will only be offered advice on programs and services if the IAR determines it is in your best interest. If the IAR provides services to you on behalf of our firm, you will be given the Disclosure Brochure of our firm, and the IAR's Form ADV Part 2B. If the services are being provided by the IAR on behalf of the unaffiliated firm, you should receive the Disclosure Brochure of that firm and the IAR's Form ADV Part 2B of that firm. The disclosure brochures describe the services provided, fees charged, conflicts of interest and other important information. You are encouraged to read and review the disclosure brochures for both our firm and the unaffiliated investment adviser firm as well as client agreements and other disclosure documents provided. If you have questions regarding how these conflicts of interests impact you, you should direct questions to your IAR.

Description of Our Code of Ethics

We strive to comply with applicable laws and regulations governing our practices. Therefore, our Code of Ethics includes guidelines for professional standards of conduct for persons associated with our firm. Our goal is to protect your interests at all times and to demonstrate our commitment to our fiduciary duties of honesty, good faith, and fair dealing with you. All persons associated with our firm are expected to adhere strictly to these guidelines. Persons associated with our firm are also required to report any violations of our Code of Ethics. Additionally, we maintain and enforce written policies reasonably designed to prevent the misuse or dissemination of material, nonpublic information about you or your account holdings by persons associated with our firm.

Clients or prospective clients may obtain a copy of our Code of Ethics by contacting us at the telephone number on the cover page of this brochure.

Participation or Interest in Client Transactions

Neither our firm nor any persons associated with our firm has any material financial interest in client transactions beyond the provision of investment advisory services as disclosed in this brochure.

Review of Accounts

Your Vantage advisor will monitor your accounts on an ongoing basis and will conduct account reviews periodically to ensure the advisory services provided to you are consistent with your investment needs and objectives. Additional reviews may be conducted based on various circumstances, including, but not limited to:

- contributions and withdrawals;
- year-end tax planning;
- market moving events;
- security specific events; and/or
- changes in your risk/return objectives.

The individuals conducting reviews may vary from time to time, as personnel join or leave our firm.

We will not provide you with additional or regular written reports. You will receive trade confirmations and monthly or quarterly statements from your account custodian(s).

Client Referrals and Other Compensation

We do not receive any compensation from any third party in connection with providing investment advice to you nor do we compensate any individual or firm for client referrals.

Trade Errors

In the event a trading error occurs in your account, our policy is to restore your account to the position it should have been in had the trading error not occurred. Depending on the circumstances, corrective actions may include canceling the trade, adjusting an allocation, and/or reimbursing the account.

Class Action Lawsuits

We do not determine if securities held by you are the subject of a class action lawsuit or whether you are eligible to participate in class action settlements or litigation nor do we initiate or participate in litigation to recover damages on your behalf for injuries as a result of actions, misconduct, or negligence by issuers of securities held by you.

Financial Information

We have not filed a bankruptcy petition at any time in the past ten years.

Item 10 Requirements for State-Registered Advisers

Neither our firm, nor any of our management persons have a material relationship or arrangement with any issuer of securities.
